

# The International Children's Exhibition of Fine Arts Lidice 1999- 2009, originals on panels

The exhibition presents original works by children awarded between 1999 and 2009 in one of the world's biggest and oldest exhibitions of children's art work. The winning works are mounted on solid panels (both sides) and protected against damage by plexifoil.

An accompanying introductory panel focusing on the exhibition's history and presence is provided in both Czech and English; all the other pictures provide bilingual captions.

The exhibition can be borrowed with a system allowing you to present it anywhere in an open space; otherwise it is also possible to hang the panels on a wall (displaying works only on one side of the panel).

The collection presents **185 original works by children from 73 countries:**
