

The International Children's Exhibition of Fine Arts Lidice 2010

Theme: BIODIVERSITY originals on panels

In this collection, one of the world's biggest and oldest exhibitions of children's art work presents the best winning works from its 38th running, which took place in 2010 with the theme of Biodiversity – Variety of Living Nature.

Through their work 135 children from 45 countries will share their personal vision of nature and its beauty with you. Their pictures are filled with exotic beetles, butterflies, freshwater and marine fish, birds, wild and domesticated animals, trees, grasses and flowers of all kinds.

The works are mounted on solid panels (both sides) and protected against damage by plexifoil.

An accompanying introductory panel focusing on the exhibition's history and presence is provided in both Czech and English; all the other pictures provide bilingual captions.

The panels can be displayed either on stands or hung on a wall.
